GROUND-WATER RECORDS FOR ST. CROIX,

U.S. VIRGIN ISLANDS, 1969-73

ABSTRACT

Ground-water levels at selected wells in St. Croix, the largest of three U.S. Virgin Islands, were monitored from 1969-73. Continuous recording instruments were installed at Mahogany, Castle Coakley, Airport, and Adventure wells, in central St. Croix. Monthly observations of instantaneous ground-water levels were also made at two wells near Barren Spot and River Gut. Precipitation data from National Weather Service stations near the Mahogany, Airport, and Castle Coakley wells are shown with the water-level data.

INTRODUCTION

Purpose and Scope

St. Croix, the largest of the three U.S. Virgin Islands (about 84 square miles) is located about 50 miles east-southeast of San Juan, Puerto Rico (figure 1). Water is not an abundant resource in St. Croix, with no perennial streams and limited ground-water resources (Jordans, 1975). The aquifers are small and shallow and in many areas produce saline water.

The population of St. Croix has increased dramatically to about 48,000 (1980 census). As a result of the population growth, water demands have also increased significantly. Ground water, although limited, is an important component of the water supplies of St. Croix. Water wells contribute about 1.1 million gallons per day (Mgal/d) for domestic uses in the island (Fernando Gomez-Gomez, personal communication).

U.S. VIRGIN ISLANDS, 1969-73**

Purpose and Scope - Continued

In 1967, in cooperation with the Water Resources Research Institute of the Caribbean Research Institute, College of the U.S. Virgin Islands, the U.S. Geological Survey initiated a project to collect ground-water data in St. Croix. The purpose of the project was to obtain baseline water-level data at selected wells throughout the island. Ground-water levels are necessary for future studies of the ground-water resources in St. Croix and to assist in the management and pumpage-optimization of existing well fields.

Climate of St. Croix

Precipitation over St. Croix averages 40 inches per year (figure 2), with a range from 30 to 50 inches (Jordan, 1975). Most of the rain occurs from May to September, although frequent droughts can occur during any period of the year. January to March are the driest months. Rainfall effects on the recharge of the aquifers in St. Croix have not been defined. The data in this report includes rainfall at selected National Weather Service Stations that could be related to ground-water levels.

COLLECTION OF GROUND-WATER DATA

Water-level data presented in this report were obtained from a network of observation wells operated by the U.S. Geological Survey, Water Resources Division, in St. Croix. The wells are located at the most important aquifers throughout the island. Water levels are reported from six (6) observation wells, of which four (4) were equipped with automatic-

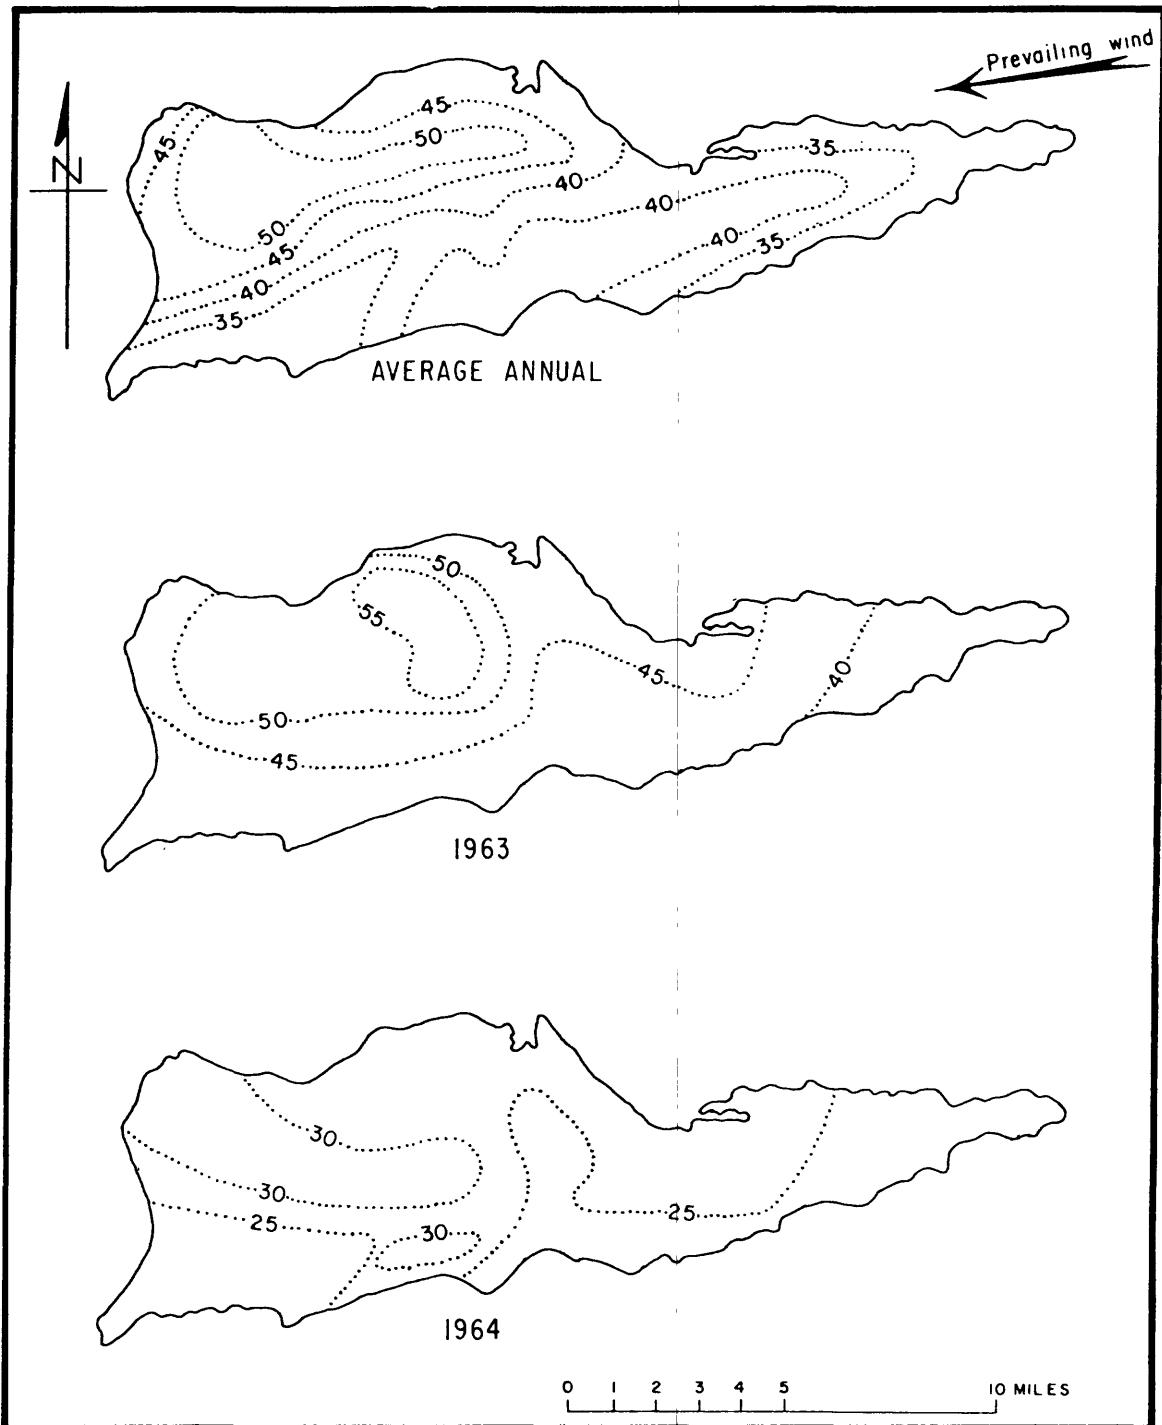

Figure 2.--Rainfall distribution, in inches on St. Croix for 1963, 1964, and average-annual precipitation, 1918-67 (Modified from Jordan, 1975).

U.S. VIRGIN ISLANDS, 1969-73**

COLLECTION OF GROUND-WATER DATA - Continued

continuous recorders. At the two other wells, water levels were measured about monthly as instantaneous values.

Water-level measurements are given in feet referenced to a land surface datum (lsd). The land-surface datum is approximately equal to the land elevation in the vicinity of the well. A measuring point is also shown for each well, also relative to the lsd. In some of the wells, a measuring point higher than the lsd is used.

At wells equipped with recorders, the mean-daily water level is shown. This contrasts with prior publications (Robison, T.M., 1973), where only every fifth day is shown. At non-recording wells the instantaneous values determined during the indicated day are shown.

Water levels are reported to the nearest hundredth of a foot (0.01 ft). Periods of missing record at the wells equipped with recorders are shown blank. A well description precedes each table of data. Included are general characteristics of the well, location, aquifer formations, datum to which elevations are referenced, and the period of record.

Additional information on wells and the data published in this report may be available from the San Juan office of the U.S. Geological Survey, Caribbean District.

APPENDIX 1. WATER LEVELS AT MAHOGANY WELL

USGS NUMBER.-- 174336064523200. Local number 17.
 LOCATION.-- Lat 17° 43' 36", Long 64° 52' 32".
 OWNER.-- U.S. Virgin Islands Government.
 NAME.-- Mahogany Road 3 well.
 AQUIFER.-- Alluvium of quaternary age and volcanic rock of cretaceous age.
 WELL CHARACTERISTICS.-- Drilled unused water table, diameter 6-in cased
 0-104 ft, perforated 64-104 ft. Depth 104 ft.
 DATUM.-- Altitude of 1sd is 70 ft above mean sea level.
 MEASURING POINT.-- Top of 6-in casing, which is 3.6 ft above 1sd.
 REMARKS.-- Recording observation well. Affected by nearby pumping.
 PERIOD OF RECORD.-- Water levels: 1964-72 [discontinued].
 EXTREMES FOR PERIOD OF RECORD.-- Highest water level 26.24 ft below 1sd,
 Dec. 16, 1969; lowest water level 74.31 ft below 1sd, Mar. 29, 1965.

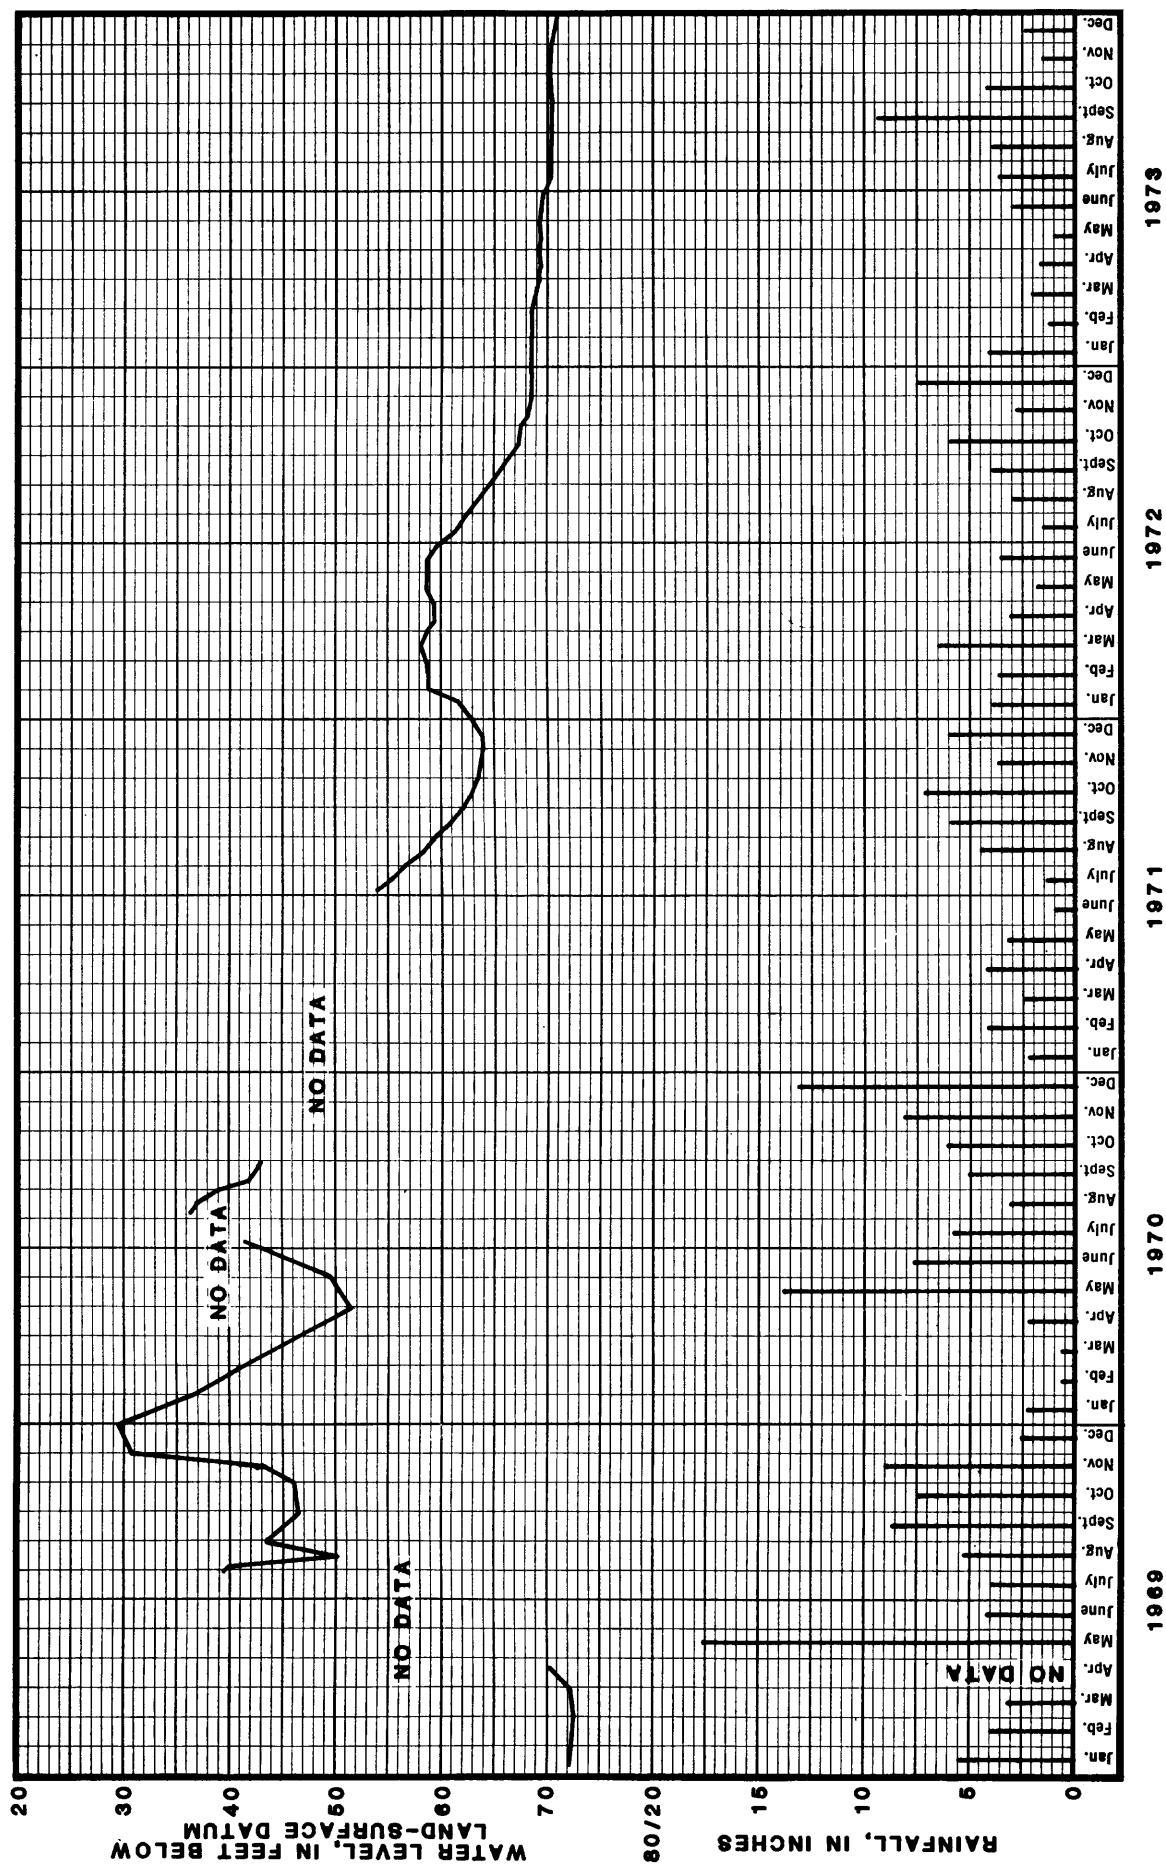

Figure 3.--Water levels at Mahogany well and rainfall at the Annaly precipitation station.

APPENDIX 2. WATER LEVELS AT AIRPORT WELL

USGS NUMBER.-- 174159064481900. Local number 13.

LOCATION.-- Lat 17° 41' 59", Lon 64° 48' 19".

OWNER.-- U.S. Virgin Islands Government.

NAME.-- Airport 39 well.

AQUIFER.-- Marl and limestone of Tertiary Age.

WELL CHARACTERISTICS.-- Drilled unused water table well, diameter 3-in, cased 0-110 ft, perforated 58-110 ft. Depth 110 ft.

DATUM.-- Altitude of 1sd is 35 ft above mean sea level.

MEASURING POINT.-- Top of 8-in casing, which is 1.7 ft above 1sd.

REMARKS.-- Recording observation well.

PERIOD OF RECORD.-- Water levels: 1962-73 [discontinued].

EXTREMES FOR PERIOD OF RECORD.-- Highest water level 29.30 ft below 1sd, Nov. 16, 1962; lowest water level 36.63 ft below 1sd, June 27, 1962.

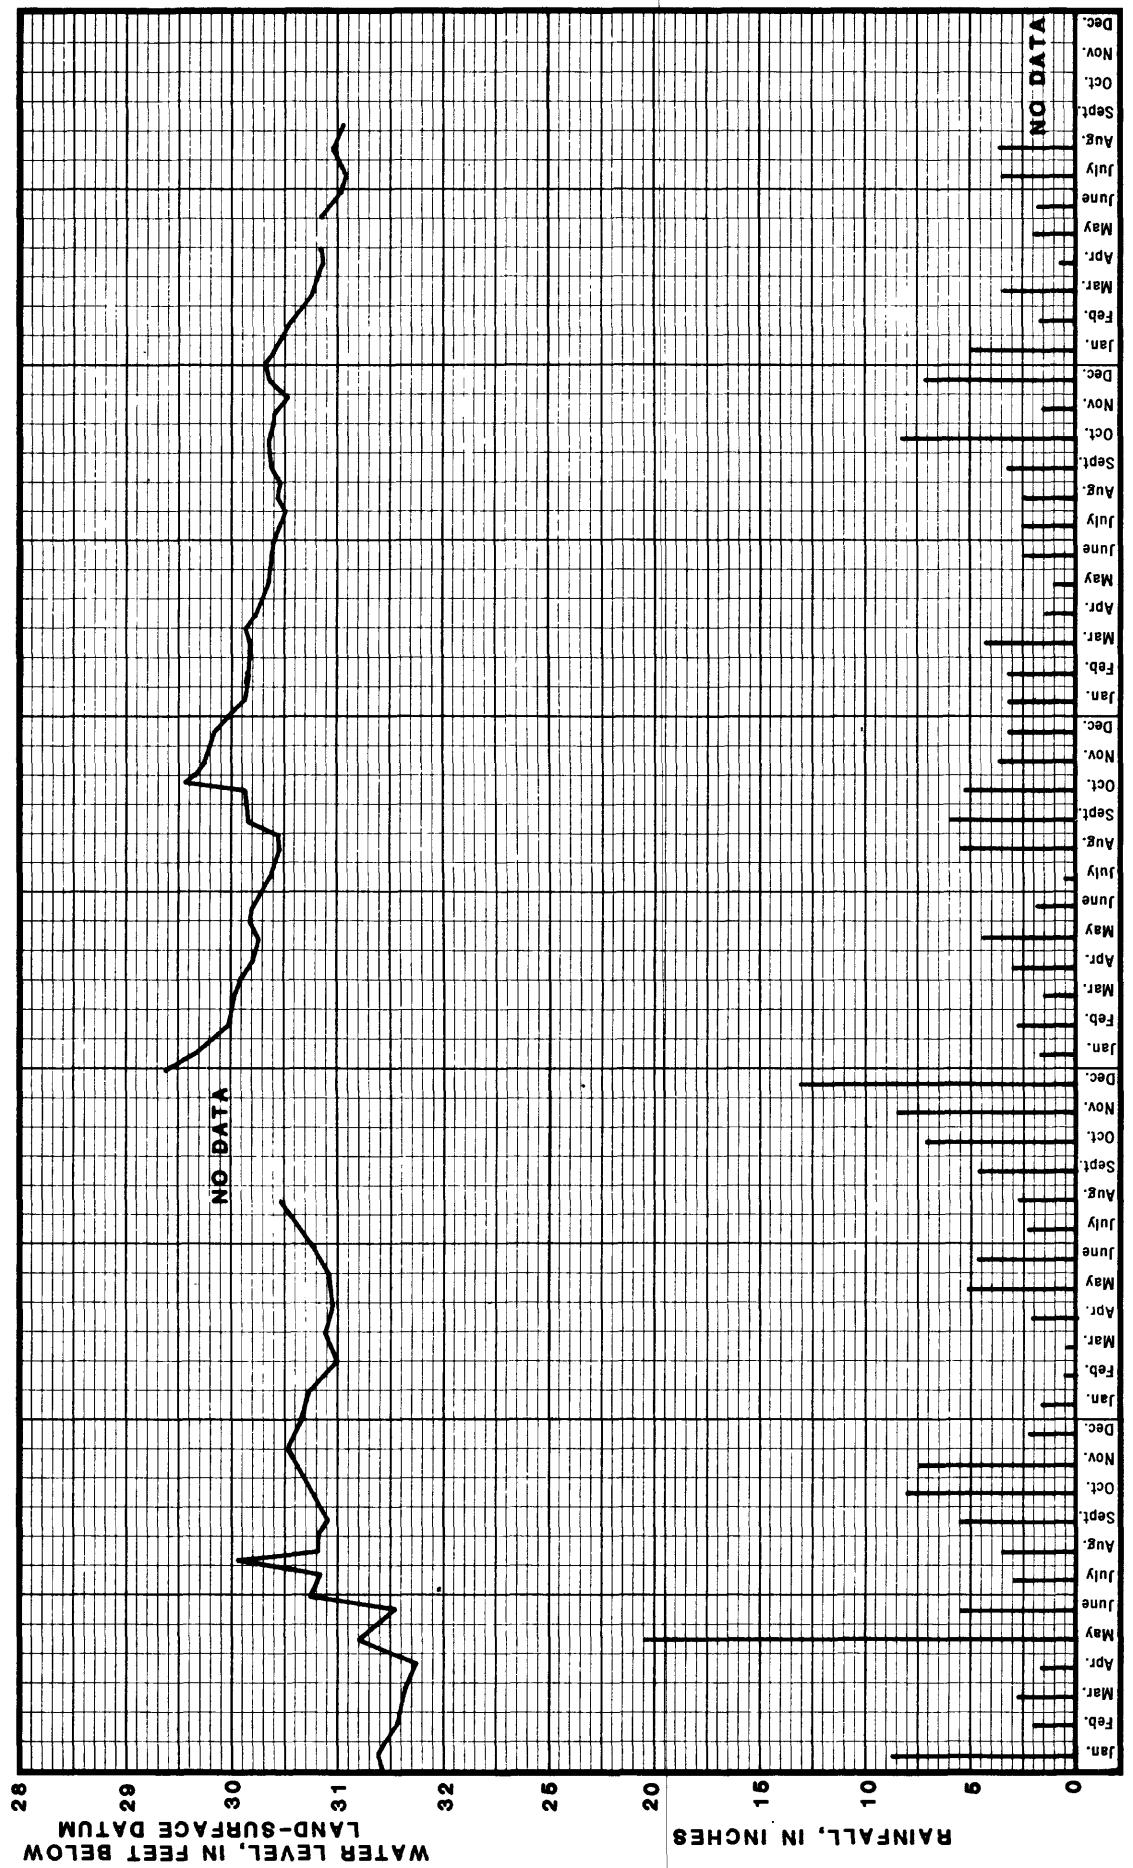

Figure 4.--Water levels at the Airport well, and rainfall at Kingshill precipitation station.

APPENDIX 3. WATER LEVELS AT CASTLE COAKLEY WELL

USGS NUMBER.-- 174339064445100. Local number USGS-46.

LOCATION.-- Lat 17° 43' 39", long 64° 44' 51".

OWNER.-- U.S. Virgin Islands Government.

NAME.-- USGS-46 [Castle Coakley].

AQUIFER.-- Marl and limestone of Tertiary Age.

WELL CHARACTERISTICS.-- Drilled unused water-table well, diameter 6-in, cased

0-154 ft, slotted 94-154 ft. Depth 154 ft.

DATUM.-- Altitude of 1sd is 97 ft above mean sea level.

MEASURING POINT.-- Top of shelter floor, which is 2.8 ft above 1sd.

REMARKS.-- Recording observation well.

PERIOD OF RECORD.-- Water levels: 1969-73 [discontinued].

EXTREMES FOR PERIOD OF RECORD.-- Highest water level 82.44 ft below 1sd,

Jan. 1, 1971; lowest water level 90.11 ft below 1sd, May 10, 1969.

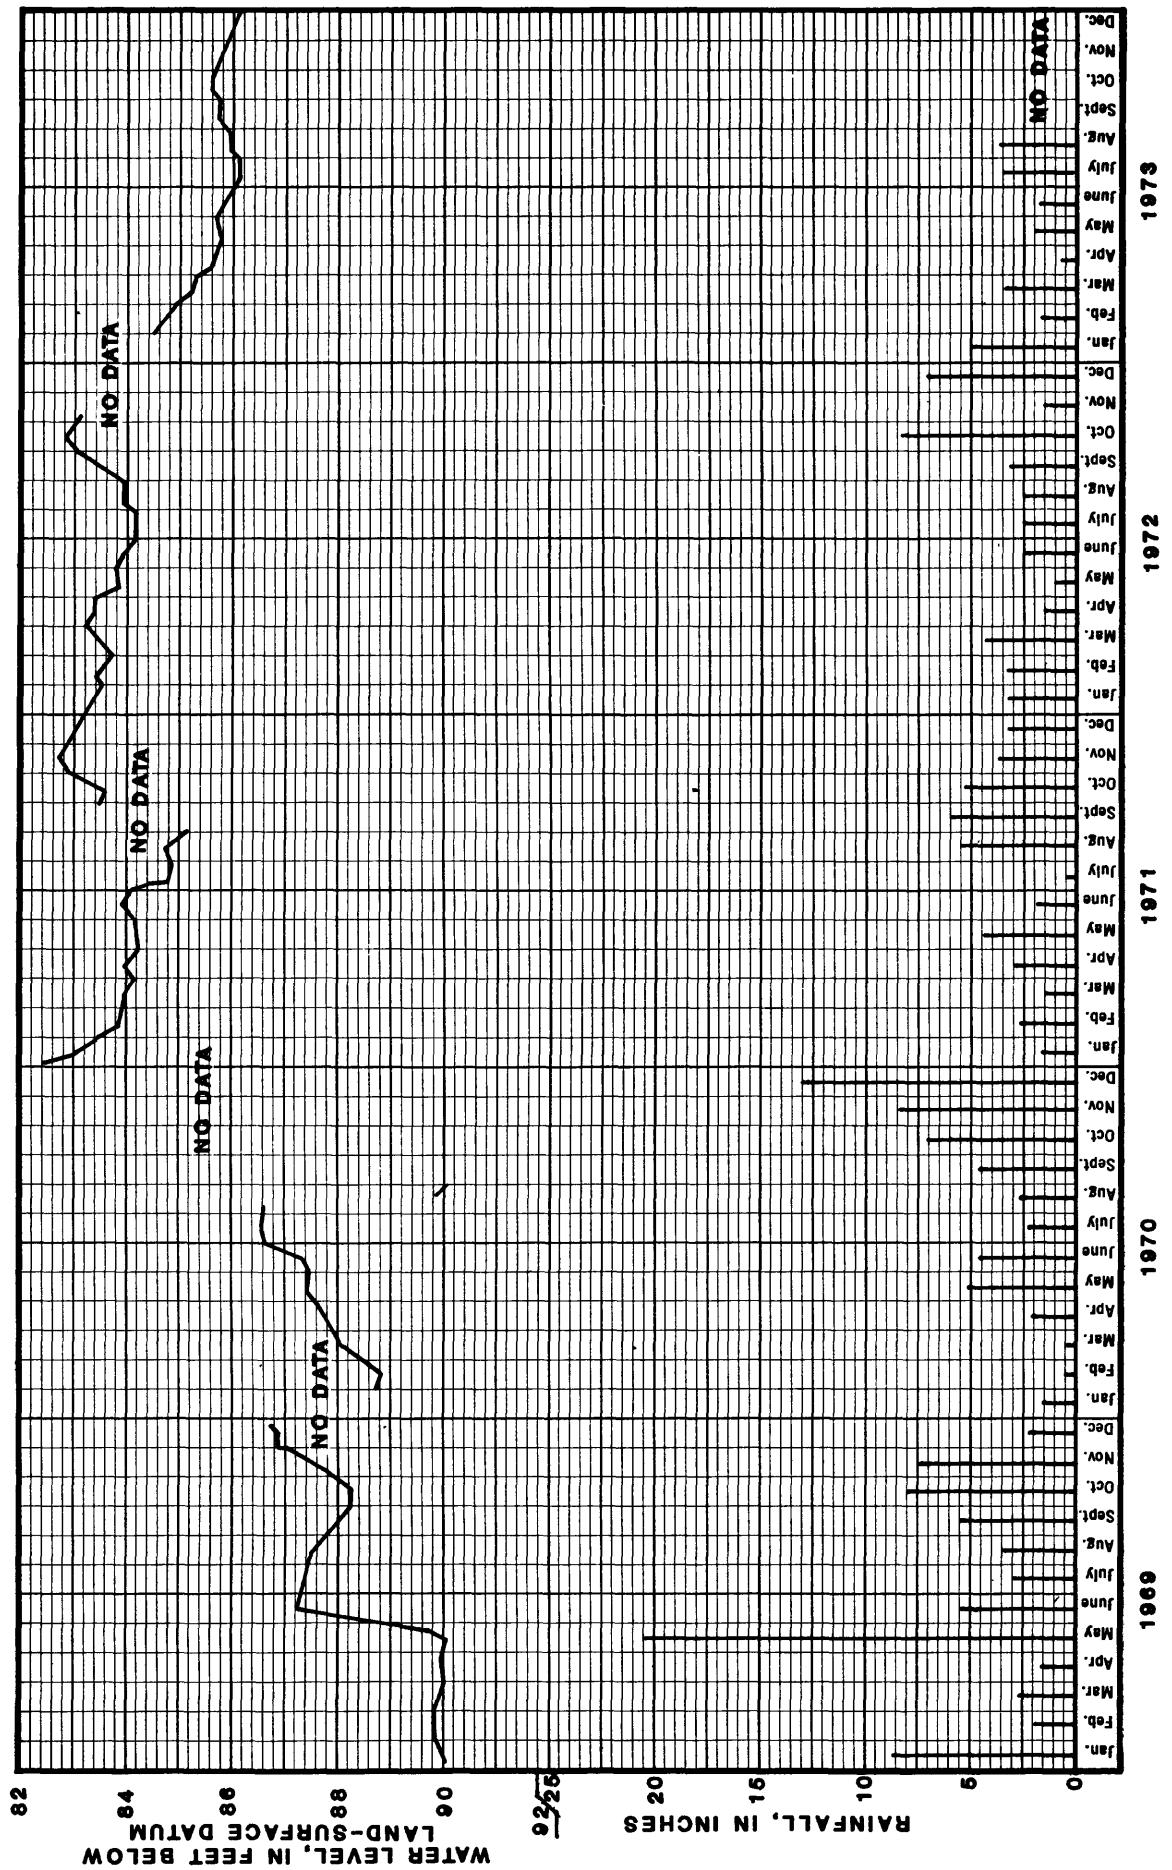

Figure 6.--Water levels at the Castle Coakley well, and rainfall at Kingshill precipitation station.

APPENDIX 4. WATER LEVELS AT ADVENTURE WELL

USGS NUMBER.-- 174303064484000. Local number 12.
 LOCATION.-- Lat 17° 43' 08", Long 64° 48' 40".
 OWNER.-- U.S. Virgin Islands Government.
 NAME.-- USGS-38 [Estate Adventure].
 AQUIFER.-- Limey sediments of Tertiary and Quaternary Age.
 WELL CHARACTERISTICS.-- Drilled unused water-table well, diameter 4-in., cased 0-50 ft, perforated 30-50 ft, open hole 50-97 ft [now plugged at 46.8 ft].
 DATUM.-- Altitude of lsd is 30 ft above mean sea level.
 MEASURING POINT.-- Top of shelter floor, which is about 0.6 ft above lsd.
 REMARKS.-- Recorder and observation well. Affected by nearby pumping.
 PERIOD OF RECORD.-- Water levels: 1966 - 69, Sept. 1970-73 [discontinued].
 EXTREMES FOR PERIOD OF RECORD.-- Highest water level 14.40 ft above lsd, Nov. 29, 1971; lowest water level, dry [well plugged at 46.8 ft].

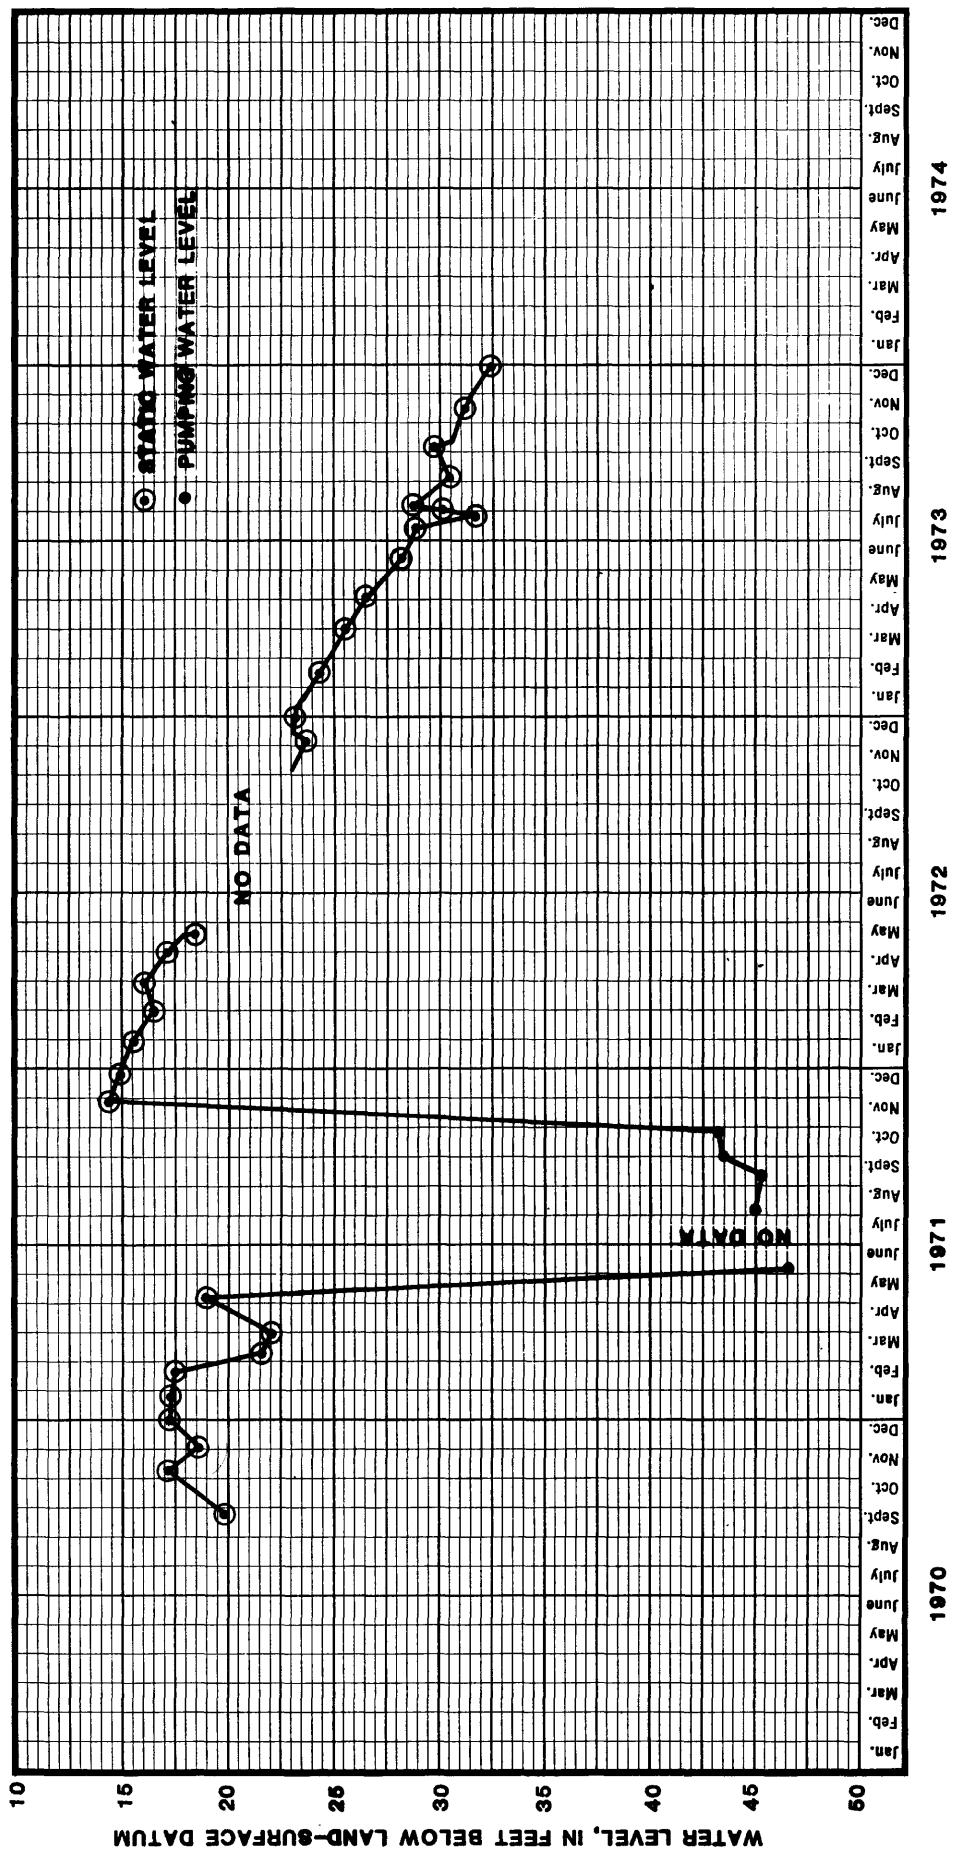

Figure 6.—Water levels at the Adventure well.

APPENDIX 6. WATER LEVELS AT BARREN SPOT WELL

USGS NUMBER.-- 174316064453800. Local number 8.

LOCATION.-- Lat 17° 43' 16", Long 64° 45' 38".

OWNER.-- U.S. Virgin Islands Government.

NAME.-- Barren Spot 7 well.

AQUIFER.-- Limey sediments of Tertiary and Quaternary Age.

WELL CHARACTERISTICS.-- Drilled water-table production well, diameter 6-in., cased 0-115 ft, perforated 55-115 ft, open hole 115-140 ft. Depth 140 ft.

DATUM.-- Altitude of 1sd is 60 ft above mean sea level. Measuring point: 1-in. hole in concrete pump base, which is about 1.9 ft above 1sd.

REMARKS.-- Recorder and observation well.

PERIOD OF RECORD.-- Water levels: Nov. 1962 to Oct. 1964, Nov. 1970 - 73
(discontinued).

EXTREMES FOR PERIOD OF RECORD.-- Highest water level 50.10 ft below 1sd, Oct. 22, 1962; lowest water level a67.25 ft below 1sd, Dec. 5, 1973.

APPENDIX 6. WATER LEVELS AT RIVER GUT WELL

USGS NUMBER.-- 174221054470500. Local number 1.

LOCATION.-- Lat 17° 42' 21", Long 54° 47' 05".

OWNER.-- U.S. Virgin Islands Government.

NAME.-- River Gut well.

DATUM.-- Altitude of 1sd is about 55 ft above mean sea level.
 MEASURING POINT.-- 3/4-in bronze nipple on pump concrete base, which is 2.6 ft
 above 1sd.

REMARKS.-- Observation well.

PERIOD OF RECORD.-- Water levels: Nov. 1970 - Dec. 1971, Jan. 1973 - Dec. 1973
 - [discontinued].

EXTREMES FOR PERIOD OF RECORD.-- Highest water level 16.60 ft below 1sd,
 Feb. 25, 1971; lowest water level a48.50 ft below 1sd, June 1, 1973.
